

VELA Tango Electric Sit-stand

ELECTRIC
HEIGHT-
ADJUST-
MENT

VELA Tango Electric Sit-stand is equipped with a short seat with a raised pommel that provides stability and the option to retain an active work position, even when you need support up high. The low backrest is excellent for your lower back as it allows you to move your shoulders, back, and arms without restraint.

VELA Tango Electric Sit-stand offers seamless, electric height adjustment, making it possible and easy for users with reduced leg strength or mobility to set the chair to the desired height.

VELA Tango Electric Sit-stand is a chair for individuals who need support and safety in a standing position, even in cases of reduced leg strength. The short seat with a raised pommel holds and supports the user and makes it easy to get close to, e.g., kitchen tables. The electric height adjustment ensures that the user is supported regardless of whether they need to reach low or high. The central brake makes the chair stable, which ensures that work in the kitchen is carried out safely.

VELA Tango Electric Sit-stand combines safety and stability, as a standing support with the option for electric adjustment. This supports individuals with reduced balance and leg strength. The unique shape of the seat and the armrests ensure stability and support during daily activities.

The raised pommel at the front of the seat provides security and support when carrying out standing tasks, as the user will not slide off the seat. The chair provides extra mobility so that the user can help themselves.

The electric height adjustment ensures that the user has the option to vary seating positions and heights for different tasks.

The user can also sit in a low position and easily "walk" the chair in, e.g., the kitchen, making it easy to do tasks at the kitchen table and at the stove.

The adjustment of the seat height, depth, and tilt, not to mention the back and the armrests, creates the optimal conditions for ergonomic seating that provides support and comfort. All functions can be adjusted while the user is sitting on the chair.

VELA Tango Electric Sit-stand is delivered in black phoenix fabric, which ensures that the chair is easy to clean, durable, breathable, and highly comfortable. VELA owns their own upholstery workshop, which always has more than 300 types of foam, textiles, and colours in stock. In need of a water repellent material, e.g. incontinence, VELA offers a large selection of artificial leather or the option to choose between different seat covers.

ACCESSORIES AND INDIVIDUAL SOLUTIONS

All VELA chairs can be ordered alongside a large selection of accessories and individual solutions to adjust the chair to suit the needs of the individual, such as a special grip for individuals whose hands and fingers are affected by arthritis. VELA offers individual solutions for upholstery, comfort, support, grip, and electric settings.

VELA Tango Electric Sit-stand is well-suited as a task chair, especially for users struggling with obesity, as the short seat provides stable support while ensuring that blood flow to the legs is not compromised. The electric height adjustment ensures that the user can get in and out of the chair without incurring painful bumps.

Accessories, such as lockable seat rotation, provides the user with support when being moved. The seat rotates while the user is in the chair, thus minimising the distance when the user moves to and from the chair.
